EXPERIRMENT 6

Mobile Network Handoff Scenario

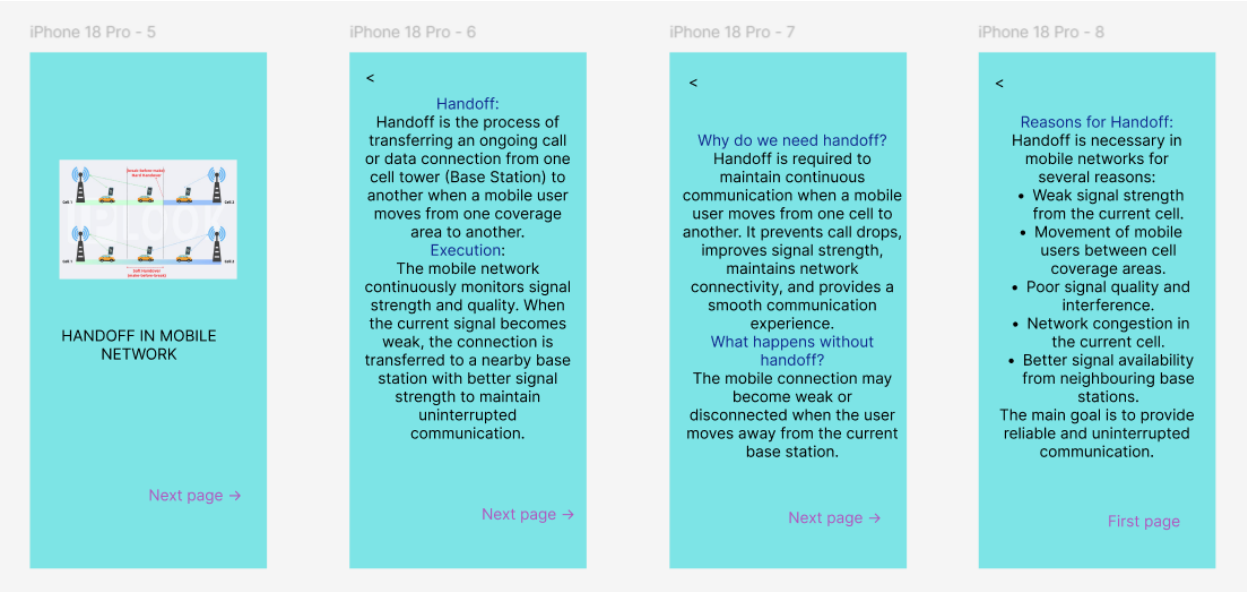

AIM:

To simulate a handoff scenario in a mobile network using Figma and visualize the process of transferring a mobile device connection from one cell tower to another without interrupting communication.

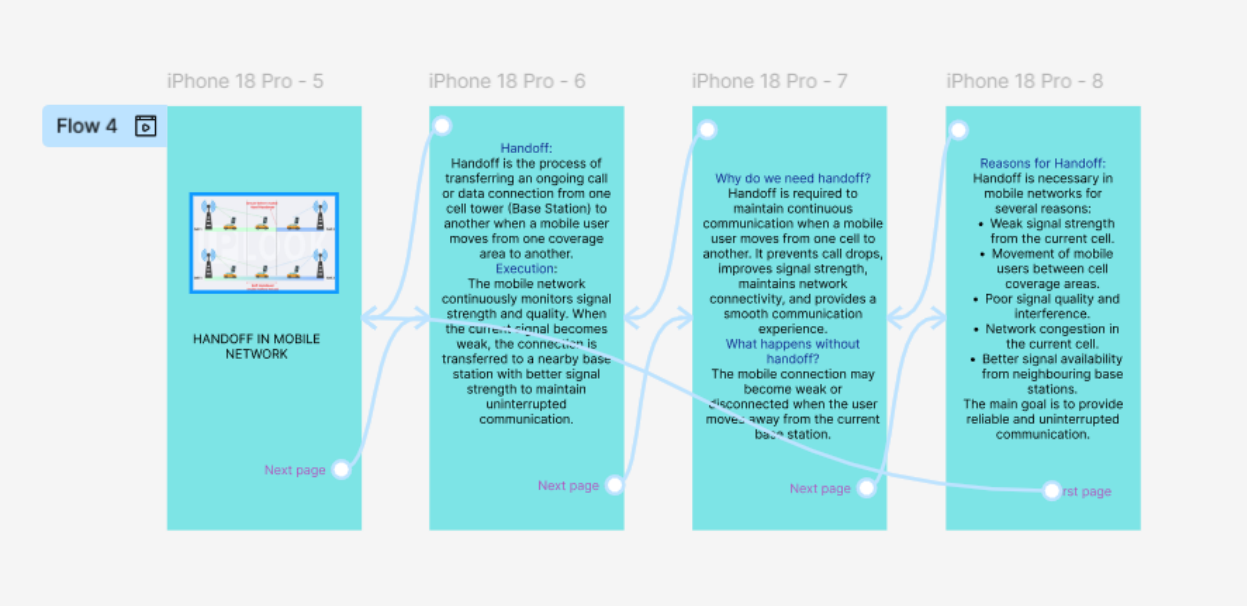

PROCEDURE:

1. Open Figma and create a new design file.
2. Create a mobile network layout with two cell towers (Base Station A and Base Station B).
3. Add a mobile device moving from the coverage area of Tower A towards Tower B.
4. Design screens showing the initial connection between the mobile device and Tower A.
5. Create another screen showing the signal strength decreasing from Tower A and increasing towards Tower B.
6. Design a handoff process screen showing the transfer of connection from Tower A to Tower B.
7. Add a final screen displaying successful connection with Tower B.
8. Use arrows and prototype connections to demonstrate the handoff process.

DESIGN:

PROTOTYPE:

RESULT:

Thus, the mobile network handoff scenario was successfully designed and simulated using Figma, illustrating the transfer of a mobile connection between two base stations without interrupting communication.
